KENWOOD IRIS GARDENS
CINCINNATI, OHIO

SUMMER, 1935 • SPRING, 1936

A STATE OF THE PROPERTY OF THE

In the selection of flowers generally much disappointment will be avoided if guidance by color description, rather than printed color reproductions, are followed. In the Iris, the coloring is so ethereal that true printed reproduction is very difficult. Colors in the printed reproductions are generally over-emphasized, and the use of favorable backgrounds produces effects that do not exist in the garden when the flower is in bloom. In the selection and effective placing of varieties, thought should be given, not only to color and form, but also height of stalk, and season of bloom. Faithful endeavor to supply this important information will be found in the accurate descriptions in this catalogue, and selections for early, midseason or late bloom should give satisfactory results.

FOREWORD

Another Iris season is at hand, and we are again thrilled by their beauty and loveliness. Each year finds better varieties introduced, Iris of finer form and color and other desirable attributes. Words fail to convey their loveliness, you must live with them to appreciate their beauty. No gardener who has fine Iris in his garden will rest content with what he has. That is the charm of a garden. It is a place of dreams, an expression of our likes and dislikes, and we derive our greatest pleasure in improving it every year, changing arrangements of flowers, finding new ways of beautifying it.

Other plants are needed to combine with Iris to balance the planting. Peonies, certain types of perennials and the low border plants help to complete the picture. Clumps of blue and white Siberian Iris are a splendid foil for the gorgeous salmon and scarlet poppies. Hemerocallis are the most dependable Summer bloomers, and the earlier varieties form a charming contrast to certain shades of Iris. Garden lovers are urged to visit our Gardens at any time. A peony exhibition garden has been planted on the highway, framed by over forty varieties of lilacs and other flowering shrubs. Come and order while the plants are in bloom.

Separate lists of hemerocallis, peonies, poppies, perennials and rock plants are available, giving height, color and time in bloom. The peony list is divided into color groups. Any of these will be mailed to you upon request.

The tall Bearded Iris have been arranged in color classes for easier identification. We hope that you will find it a great help in selecting varieties. An alphabetical index is found on pages 25 to 28.

GENERAL EXPLANATION OF COLOR CLASSES

- Class 1 A—White. Type, White Queen.
 - Type, Mme. Chereau. 1 B—Plicata.
 - 1 C-White bicolor. Type, Rheine Nixe.
- Class 2 A-Pale blue lavender. Type, Corrida.
 - 2 B—Medium blue purple. Type, Neptune.
 - 2 C-Dark blue purple. Type, Perfection.
- Class 3 A—Pink lavender. Type, Queen of May.

 - 3 B—Red purple. Type, Opera.3 C—Red or red brown. Type, Ambassadeur.

Class 4 A—Blue blend. Type, Quaker Lady. 4 B—Yellow blend. Type, Ochracea.

4 C-Pink blend. Type, Isoline.

Class 5 A—Yellow. Type, Shekinah.
5 B—Yellow bicolor. Type, Lorelei.

Each class has been subdivided into three groups: Novelties, Distinctive, and Standard Varieties. By combining with neighbors or garden club members, you can take advantage of the quantity prices, especially in the third group, where really fine varieties have been drastically reduced. Since we have a plentiful stock of these, you will receive a generous count in your order. Look for the shipping terms at the end of the catalog.

New Introductions for 1935

The ultimate value of an Iris is its garden effect. No Iris is perfect, but each has a charm of its own, and there is an elusive quality in some that causes you to want them. That is the test of the worthiness of a variety. Judging points help to decide as to perfection, but many highly rated Iris leave one cold, and preference is given to others that may not have been perfect in certain qualities.

We have been growing some seedlings for several years, studying their differences from other varieties, watching the public reaction to them, and finally decided that they were worthy to be disseminated in other gardens. They are effective in a mass, several are very lovely when arranged indoors. We need them, and hope that you will like them. Some are not tall, but there is a deficiency of good Iris of medium height, to plant in front of the taller varieties. Because of sufficient stock, we will be able to introduce them at a moderate price, and you can not afford to be without them. The following names are tentative, subject to approval by the American Iris Society.

HEARTH FIRE (Emig. 1935)—(LM 32)—4³/₄" tip to tip. Segments 2" across. S. arched, light bronze flushed reddish violet, appearing as a dull red violet; F. semi-flaring, deep velvety carmine violet with a crimson underlay, so that it has a ruddy glow. Beard deep gold. Close blood-red brown reticulations on a yellowish haft, covering the sides, and broader lines in the center. A very brilliant rosy red of heavy substance and good carriage. The brown haft intensifies the coloring. More carmine than Rasakura......\$4.00

IRMA MOORE (Emig. 1935)—(M 36)— $5\frac{1}{2}$ " tip to tip. S. 3" wide, arching, somewhat crinkled, palest yellowish flesh suffused pale violet, giving a pale opalescent pink tone; F. drooping, 23/4" wide, veined velvety carmine violet on a rosy violet ground, as to be a self color. A pale edge matches the standards in color. Beard light lemon yellow, fading at edges. Van Dyke brown reticulations on a creamy haft. A charming rosy bicolor of firm texture and with a good branching habit. Lovely in the garden, and very effective

- starry sky (Emig. 1935)—(M 36)—5" tip to tip. Segments 2½" wide. S. erect, cupped, dark violet purple; F. semi-flaring, very velvety blackish violet purple; heavy violet reticulations on a white haft almost covering it, with dark brown at outer edge. Beard deep orange yellow. A very dark blue, lit up by the bright beard and light center. Branches nicely. Has great substance and carrying quality and different from other dark blues.......\$2.00

One of Each of the Above Novelties (Cataloging \$10.00) for \$7.50

Introductions 1931-34

- ELYSIAN (Saur-Emig. 1932)—42". Lovely clear daffodil yellow flowers, with artistic maroon veinings at the haft, adding definitely to its attractiveness. The blooms are quite large, measuring over 5 inches in length. Splendid form with long, almost horizontal falls of a very heavy texture. It is a prolific bloomer, with well branched stems
- IDDA-BIDDA (Ayres-Emig. 1933)—(M)—7". This charming late dwarf has bloomed in Dr. Ayres' garden for several years and was always commented on. It may be called a dwarf yellow plicata, and

- NANOOK (Ayres-Emig. 1932)—44". A fine creamy white of good form and heavy texture. The standards are overarched and closely held, a warm amber white at the center, deepening slightly at the edges and deeper at the base. The falls are slightly flaring, pure white, with coppery yellow haft veins. The effect is a fresh opaque color, not the transparent effect of most whites. The stiff candelabra-like stems branch from the ground, generally having 4 to 6 flowers open at once
- ROBERT (Ayres-Emig. 1933) --- 35". So named in memory of our eldest and last son, who passed over late April, 1932. Because of his intense love and interest in Iris, we felt it a fitting tribute to name an Iris to perpetuate his memory. Robert had a cheery disposition and a truly fine character, and so this seedling, by its golden color, reflects these qualities. S. domed, overarched, pale amber with a golden cast, and a flush of lemon yellow at the base; F. flaring, with pale azure blue flush in the center of the blade; overlaid with golden amber, pale at the bottom and much deeper in color at the sides. The haft is cream, closely veined deep straw yellow. Beard deep golden yellow. The flower is over 5 inches in length and has broad divisions. A beautiful light yellow, with a sparkling iridescence in the sunlight. The light blue flush on the falls provides just the right contrast in color. One parent is Tuscany Gold, and, in addition, it has Dominion strain on both sides, so that the flowers have heavy substance and good form. The stems branch widely half way As a means of comparison, we found that Pluie D'Or was about one-third its size. It should hold its own for years to come.

\$10.00

- SAMERKAND (Wareham-Emig. 1934)—(M 36)—A brilliant bronze and red toned Dominion seedling. The smooth arching standards are bronzy fawn flushed reddish violet, F. semi-flaring, a deep velvety carmine violet. Beard intense red gold. There is a brilliant glow emanating from the center of the flower, caused by the bright beard and haft coloring......\$3.00
- THEODOLINDA (Ayres-Emig. 1932)—42". A plicata of Los Angeles size, and of positive hardihood and vigor. It might be called a glorified Rose Salterne, as it has the clear colored reticulations that make Salterne distinct, but there comparison ceases. The flowers measure 6½ inches in length. The broad, domed standards are white with a buttonhole stitching of light blue along the margins. The falls are kid-like in texture, broad and straight hanging, with deep blue violet markings at the center, changing to clear blue at the edge. It has Dominion substance, and the stems branch widely. \$3.00
- One each of the 1933-34 Introductions, Including Cadmia, Claire de Lune, Robert and Samarkand (Cataloging \$21.50) for \$16.00. One Each of the 1932-33 Introductions (Cataloging \$11.10) for \$7.50. One Each of the Twelve Varieties (Cataloging \$34.10) for \$23.00.

JOIN THE AMERICAN IRIS SOCIETY \$3.00 a year

Four bulletins each year, with Iris notes, names of new varieties, etc. Checks should be made payable to the American Iris Society and sent to B. Y. Morrison, 116 Chestnut St., Takoma Park, D. C.

Tall Bearded Iris

Sun and good drainage are essential for their success. Place the rhizome on the surface when you plant, except in fall, when it is advisable to plant more deeply to prevent heaving. Mulch with excelsior or straw the first winter. The clumps should be re-set every few years, and the old rhizomes thrown away. Bonemeal is a safe fertilizer. The ease of growing these Irises, and the beauty of their bloom, should cause them to be widely planted.

The initials after each variety denote its season of bloom, as: E—Early; EM—Early Midseason; LM—Late Midseason; L—Late. S. and F. are used as abbreviations for standards and falls. The figures after the initials indicate the height of the flower stalk in inches.

Prices for the varieties in the standard groups of each color class are as follows:

GROUP 1: 15c each; 3 of a kind for 40c, \$1.00 per doz.; \$7.00 per 100. GROUP 2: 10c each; 3 of a kind for 25c, 70c per doz.; \$4.00 per 100. Six or more at the dozen rate; 25 or more at the 100 rate. One and three of a kind only are postpaid.

Class 1 A—White

White or Tinted White Varieties.

NANOOK (Ayres 1932)—(M 44)—Beautiful amber white. See introductions, page 4	1.25
SELENE (Connell 1931)—(42)—Very large silvery white, with well branched stems. Has good form and texture. Quite hardy. H. M. A. I. S., 1932	1.00
SUMMIST (Nich. 1934)—(M 36)—A large glittering pure white with a yellow beard and deep yellow haft markings. Tall and well branched. Has good substance	10.00
VENUS DE MILO (Ayres 1931)—(42)—Dominion seedling of clear white, with a yellow beard. The smooth heavy petals are able to withstand wind and rain; well branched stems. H. M. A. I. S., 1932	1.25
WAMBLISKA (J. Sass 1930)—(48)—Huge white of heavy substance, with a faint blue flush in the center. Free bloomer. H. M. A. I. S., 1931	1.00
DISTINCTIVE VARIETIES:	
MICHELINE CHARRAIRE (EM 36)—An exquisite white, with gold beard and haft veinings. Hardy and a free bloomer	.25
SHASTA (Mohr-Mitchell 1927)—(EM 30)—A snow white of excellent shape and substance, with a faint amber glow in the center	.35
SOLITAIRE (M 38)—A gleaming white on branched stems. Has a brilliant yellow beard and fine form and substance	.75

STANDARD VARIETIES:

GROUP 2: ATHENE (M 30), good form and substance; GAVIOTA (M 32) S. and F. tinted pale yellow; LA NIEGE (LM 24), waxy ruffled white; WHITE QUEEN (M 32), an absolutely pure white; ZADA (M 36), very free bloomer; good form.

Class 1 B—Plicata

Varieties with a White or Creamy Background, Feathered, Dotted or Flushed with a Contrasting Color.

AMBROSIA (Sturt 1928)—(36)—White, flushed pale pink in the center. A delightful color, and enhanced by a rich orange beard	•75
	•/)
IDDA-BIDDA (Ayres-Emig. 1933)—(M 7)—A dwarf yellow plicata. See introductions, page 3	•75
JADU (Sturt 1928)—(30)—The standards and style branches are blush pink; falls white, dotted with rose. Very attractive	.50
LOS ANGELES (Mohr-Mitchell 1927)—(48) — A giant white flower, with standards and style arms faintly edged blue, and falls marked blue near the haft. A really fine variety that is hardy here	•75
NEHAWKA (J. Sass 1929)—(28)—Gracefully ruffled large flowers of white, so heavily stippled with purple as to appear as a self at a distance	.25
SACRAMENTO (Mohr-Mitchell 1929)—(48)—A distinct variety. The immense white flowers are marked and dotted red purple along the edges of the standards and falls. The center is illuminated with a prominent golden beard	1.00
SAN FRANCISCO (Mohr-Mitchell 1927) — (40) — Widely branched stems carry large white flowers, distinctly edged lavender. A very lovely variety. Needs good drainage. Awarded Dyke's Medal, 1927, A. I. S.	.75
THEODOLINDA (Ayres 1932)—(M 42)—Giant flowered Plicata. See introductions, page 5	3.00
DISTINCTIVE VARIETIES:	
ANN DELIA (M 27)—Lovely rosy plicata. Ruffled standards of light lilac, and white falls bordered rose	.50
BEAU IDEAL (M 30)—A good sized white, distinguished by a wide solid border of dark purple. Quite distinct	.20
MRS. A. S. HOYT (LM 27)—Heavily ruffled pure white, dotted and veined rose	.25
KING CARL (LM 27)—S. ruffled light pinkish cinnamon; F. cream heavily peppered purple bronze. Most unusual and attractive variety	.25

KENWOOD IRIS GARDENS
LONA (M 30)—S. flushed peach; F. cream dotted and striped violet. Another of Sass' interesting Plicatas
PRINCESS OSRA (LM 36)—Large white flowers dotted clear blue, and striped near the margins. Very attractive
TRUE DELIGHT (LM 36)—Rose colored venations along the margins. A very good pink toned Plicata
STANDARD VARIETIES: GROUP I: ANNA FARR (M 30), white, edged pale blue; DAMOZEL (M 38), large white, etched lavender; JUBILEE (M 30), S. peach, F. cream dotted brown; KALOS (M 28), white, flushed pale rose; ROSE SALTERNE (LM 36), white, edged clear blue; TRUE CHARM (M 42), large white, edged blue.
GROUP 2: MME. CHOBAUT (M 30), cream, bronze markings; ZOUAVE (M 24), white, dotted violet.
Class 1 C—White Bicolors Varieties with White or Tinted White Standards; Falls of a Contrasting Color.
NEW VARIETY: DOROTHY DIETZ (Williamson 1929)—(M 32)—S. light chicory blue, fading to white; F. pansy violet, paler at margin. Large flower of good form
DISTINCTIVE VARIETIES:
ESTRELLON (LM 38)—S. ivory white, F. deep red garnet with a cream margin. A very clear toned variety
GEN. McPHERSON (L 33)—S. amber white, F. pansy purple20
LENZSCHNEE (M 32)—Pure white with a halo of pale sky blue on the falls. Lovely coloring
MARY WILLIAMSON (M 30)—S. pure white; F. hyacinth purple with a wide silvery white border. Ruffled petals 20
MILDRED PRESBY (M 32)—S. ivory white; F. velvety pansy purple. One of the finest of the white bicolors
STANDARD VARIETIES:
GROUP 1: ANNE LESLIE (M 32), rosy white and carmine; B. Y. MORRISON (L 33), S. pale violet, F. deep purple, pale edge; DALILA (LM 24), flesh white and russet red; SALONIQUE (L 32), creamy white and red purple.
GROUP 2: LYCAENA (E 33), white and purple; RHEIN NIXE (LM 36), white and deep violet blue; SYPHAX (M 30), pale violet and deep crimson; TRISTRAM (VL 30), white and black purple.
8

Class 2 A—Light Blue

Varieties of a Light Blue or Purple Color.

BUECHLEY'S GIANT (Wassenberg 1931)—(42)—A very lovely Iris with the Lord of June coloring. S. erect and domed; F. broad and flaring. Stalks are nicely branched and the huge flowers have a good substance and form	2.00
CLAIRE DE LUNE (Wareham-Emig. 1934)—(M 30)—A large	3.50
DISTINCTIVE VARIETIES:	
BALLERINE (M 48)—S. very broad, waved at margin, light blue violet; F. slightly deeper shade	.20
BRANDYWINE (M 36)—Pale silvery blue with a golden beard	.15
ELSA (M 38)—Light violet blue, with an orange beard	.35
GLEAM (LM 42)—Pale lavender blue self, with a golden beard.	.25
HORIZON (M 36)—A large uniform light blue self	.50
JACQUELINE GUILLOT (LM 36)—Clear silvery blue. Very effective to plant with yellows, pinks and blends	.15
LEONATO (M 44)—Very large, light lavender blue	.20
MARY BARNETT (M 36)—Clear lavender blue, golden beard Fine variety	.25
SANTA BARBARA (EM 40)—Pure lustrous lavender blue, with horizontal falls. Good substance	.25
SHYLOCK (LM 42)—Very large silvery pale violet	.20
SOUV. DE L. MICHAUD (EM 48)—A very lovely pale lobelia blue, with a silvery sheen. Large flowers	.35
STANDARD VARIETIES:	

- GROUP 1: ANDREE ANTISSIER (VL 42), pale porcelain blue; ARIEL (E 30), harebell blue; BRANDYWINE (M 36), pale silvery blue with a golden beard; DUKE OF YORK (M 38), large mauve blue; HALO (M 34), light violet blue bicolor; JACQUELINE GUILLOT (LM 36), clear silvery blue bicolor; LADY FOSTER (EM 40), lovely pale blue; LORD OF JUNE (M 48), large pale blue bicolor; PRINCESS BEATRICE (EM 38), large pale blue.
- GROUP 2: ALBERT VICTOR (M 36), blue lavender; CHESTER HUNT (LM 26), clear blue bicolor; CORRIDA (VL 32), gray blue self; GLEAM O' GOLD (M 42), light lavender, center tinted gold; HARPALION (EM 40), large lavender blue bicolor; MOTHER OF PEARL (LM 38), large silvery lavender.

Class 2 B-Medium Blue

Varieties of a Medium Blue and Purple Color.

NEW VARIETIES:

BLUE BANNER (Kirkland 1929)—(L 36)—S. medium blue lavender, frilled; F. deep rich velvety blue, shading to a pale blue at the edges. A brilliant and outstanding variety	.50
BLUE HILL (H. Sass 1930)—(40)—A fine addition to the very clear toned blue varieties; a little darker than Sensation. Striking white beard. Stems perfectly branched. H. M. A. I. S., 1932	.75
DISTINCTIVE VARIETIES:	
ANN PAGE (M 38) — Large flowers of medium blue. Free	
	.20
ANTONIO (E 42)—S. light lavender violet; F. bright red purple. Very large flowers with long divisions	.20
BALDWIN (M 42)—A very large manganese violet self. Broad divisions and heavy substance	.50
BELLORIO (E 32)—Greyish lavender, with purple veins. Unusual	.25
CONQUISTADOR (EM 50)—Large mauve blue bicolor. Vigorous	.20
GABRIEL (M 44)—S. clear steel blue; F. bright violet blue. Good form	.25
GANDVIK (LM 36)—S. pale violet; F. clear blue purple, paler edge. A splendid broad petaled flower	.25
REALM (LM 42)—Large clear toned medium blue	.25
SIMONE VAISSIERE (M 36)—S. pale blue; F. clear blue. Good form	.20
SENSATION (L 44)—Beautiful clear blue of heavy substance, with horizontal falls. Very good	.00
STANDARD VARIETIES:	
GROUP 1: EMIR (LM 40), blue violet bicolor; HERMIONE (M 3 good medium blue bicolor; YEOMAN (M 36), S. lavender blue, deeper; large flower.	
GROUP 2: COMO (LM 48), lavender blue; HIPPOLYTA (M 3 mauve blue bicolor; JUNIATA (M 38), clear violet blue; RAPUT (LM 36), bright violet self; ROSEDALE (M 36), good cl blue.	٩J-
Class 2 C—Dark Blue	

Varieties of a Dark Blue or Purple Color.

BLACK WARRIOR (I	Nich. 1934)—(LM 38)—Large flaring deep	
blackish self. A c	full beard harmonizes with the bloom color.	
		5.00

BLACKAMOOR (J. Sass 1932)—(M 40)—A very fine large dark blue purple. Almost black when newly opened, lightening to blackish violet. The color tone is enhanced by a blue beard. H. M. A. I. S., 1931	2.00
BLACK WINGS (Kirk. 1931)—(LM 34)—Very fine velvety blue black, with broad petals. A. M., A. I. S., 1933	3.00
BLUE VELVET (Loomis 1930)—(M 46)—A clear, rich dark blue self, with velvety falls and orange beard. Large flowers of heavy substance on finely branching rigid stems	1.25
GRANDIOSA (Donahue 1930)—(M 42)—S. raisin purple; F. dark blue purple. Yellow beard. Stems branch widely	.35
MELDORIC (Ayres 1930)—(M 35)—A black purple self. Very large flower of good form and substance. Free bloomer	2.50
MME. SEROUGE (Cayeux 1929)—(M 42)—S. violet; F. spreading and well rounded of deep blackish tone, with a pale Bishop's violet edge. Cert. of Merit and Special Prize S. N. H. F. for one of the best three Irises of 1929	1.25
OREGON GIANT (Kleins. 1930)—(LM 40)—S. of blackish violet, F. flaring, velvety black purple. Heavy gold beard	.75
ROYAL BEAUTY (McKee 1932)—(M 48)—Intense deep blue flowers on well branched stems. A. M., A. I. S., 1932	3.00
SAN DIEGO (M. Mitch. 1929)—(EM 46)—A large velvety blue purple bicolor. Broad divisions	. 75
SIR MICHAEL (Yeld 1925)—(M 48)—S. clear lavender blue; F. velvety deep blue purple, with brilliant red gold beard. A very fine and clear toned bicolor	.50
VALOR (Nicholls 1932)—(52)—S. deep violet; F. velvety blackish violet, shading to deep raisin purple at edge. Bright yellow beard. A very fine variety with large flowers. Branching stems. H. M. A. I. S., 1932	2.50
WINNISHIEK (Engel. 1933)—(LM 42)—An excellent dark blue, deeper and bluer in tone than Blackamoor. Good form and substance	2.50
DISTINCTIVE VARIETIES:	
AMNERIS (L 36)—A very clear dark blue bicolor	.35
BUTO (M 30)—Rich velvety royal purple	.35
DOMINION (L 36)—S. bluish violet; F. velvety indigo purple. Broad divisions and heavy substance	.35
GEO. TRIBOLET (M 40)—Dark violet and red purple bicolor.	-20
LADY LILFORD (E 30)—Onocyclus hybrid of deep violet purple	.35
MAJESTIC (M 42)—S. pale bluish mauve; F. purple edged blue violet. Very large flowers on strong stems	.20
MT. ROYAL—(M 36)—Deep bluish violet with dark velvety falls	.35

NAOMI (M 34)—S. bright blue; F. velvety Jahlia carmine25
SOUV. DE MME. GAUDICHAU (EM 36)—Large bluish purple bicolor. Very good form and color
SWAZI (L 38)—S. bluish violet; F. rich pansy purple
STANDARD VARIETIES:
GROUP 1: ALCAZAR (EM 42), large blue purple bicolor; EGLA-MOUR (EM 30), huge deep purple bicolor; TOM TIT (LM 18) deep violet purple self.
GROUP 2: ARCHEVQUE (EM 24), velvety dark purple; AZURE (LM 32), clear violet blue bicolor; HARMONY (EM 24), deep violet purple; LENT WILLIAMSON (EM 36), dark violet bicolor; PERFECTION (M 24), dark violet; POLARIS (M 42), bright violet self; PROSPERO (LM 38), S. lavender blue; F. red purple.

Class 3 A-Pink

Large.

Varieties-Pink or Mauve Pink Color.

NEW VARIETIES:	
coralie (Ayres 1932)—(M 38)—Broad standards of clear pale red, flushed mauve, and the falls of glowing wine red. A deep rosy bicolor of unusual coloring. Lovely. (Dykes Medal, 1933.)	0.00
DAZZLER (Wmsn. 1932)—(M 36)—Good sized blooms of phlox purple, falls much deeper in color. More rosy in tone than Seminole	5.00
ELOISE LAPHAM (Lap. 1932)—(M 34)—A very lovely pale pink of unusual substance. Branching stems	2.00
ETHELWYN DUBUAR (Lap. 1932)—(M 36)—Soft rosy pink with a smooth finish. Holds its color well	2.00
FRIVOLITE (Cayeux 1930)—(M 40)—A lovely shrimp pink with golden lights. Deeper in tone than Marquisette	1.25
LORETTO (Nesmith 1930)—(38)—A clear soft pink of good size and substance. Widely branching stalks	.75
PINK SATIN (J. Sass 1930)—(M 42)—A fine pink self of great beauty	2.25
PRAIRIE ROSE (Egel. 1933)—(M 36)—An unusual heavy textured medium rose pink. Larger and deeper in color than Rheingauperle	0.00
ROSE ASH (Mor. 1930)—(36)—A lovely subdued rose color, deepening below the beard. Large flower of good substance and form	1.00
ROSE OF CUBA (J. Sass 1932)—(34)—A new rose toned Iris, with a dark splash of color at tip of beard. Good carrying color	1.00

ROSE MITCHELL (Essig 1929)—(40)—A charming rose colored self, with a yellow beard	1.00
ROSE PETAL (Murrell 1929)—(M 42)—Flowers of medium size and good substance. A deeper pink than Aphrodite	4.00
DISTINCTIVE VARIETIES:	
APHRODITE (EM 48)—Fine lilac pink, with a long blooming season	.20
AVALON (LM 36)—Large, silky pinkish lavender	.20
ELIZ. EGELBERG (M 48)—A fine mauve pink bicolor	.35
FASCINATION (M 48)—A beautiful shade of warm brilliant pink	.50
FOLKWANG (M 30)—S. pale rose; F. claret red, deep cream edge	-20
FRIEDA MOHR (M 44)—Very large lilac and rose bicolor	.35
KANSAS (M 48)—An unusual shade of deep brownish rose	.60
MARQUISETTE (M 40)—Pale shrimp pink shaded salmon	.60
MME. C. BOUSCANT (M 44)—Large orchid pink, of fine form	.35
MRS. M. CRAN (EM 46)—A brilliant deep rose	.20

Dwarf Iris

We always look forward to the blooming of Dwarf Iris, as they herald the spring season. Iris reticulata is the first to appear, blooming in late March or early April. A week later Atroviolacea comes, and then the others in rapid succession. They are invaluable for early color in the front border of the garden, where the taller ones appear to advantage. These can be used as cut flowers to combine with daffodils or early tulips. The dwarfer varieties have become very popular for planting in rock walls or slopes, where their beauty can be more closely observed. There is nothing more lovely than drifts of the delicate blue of Coerulea, combined with pink and white. The dark blue and red purples furnish a color not found in other perennials, and look especially well with arabis or white phlox, and the yellow erysimum. Some bloom again in Fall, and so are valuable for this quality.

From records kept for several years, we have endeavored to work out a simple table indicating the time of blooming; this should prove a great help, as it will assist you in selecting varieties for continuous bloom, as well as for color combinations that bloom at the same time.

Dwarfs bloom approximately 4 weeks. Each week may be represented by a numeral, 1, 2, 3, and 4. Early bloomers are marked 1, and the late ones 3 and 4. Some bloom more than one week, and are marked accordingly. These generally have a few blooms open at a time, but bloom over a longer period. Others bloom in a shorter time, but produce a greater mass of bloom. This table is still incomplete and subject to change.

APHYLLA OSIRIS (3-4)—10". Large blue purple, falls deeper \$.35
ARAMIS (2-3)—7". Pale yellow bicolor. Long divisions	.20
ARENARIA (Flavissima)—3". A bright yellow, with a golden beard. Tiny rhizomes with many small nodes. Likes a sandy soil	.35
ATROVIOLACEA (1-2)—4". Wine colored flowers of good form	.15
BLACK MIDGET (3-4)—5". Long soot black buds opening to deep red purple flowers with long narrow divisions	.25
BLUE JADE (2-3)—7". Large dark red purple, with velvety garnet purple falls. Beard orange. Good form. Flower measures 4" from tip to tip	.25
BLUESTONE (1-2-3)—6". Blue purple. Often blooms in fall	.10
BOQUET (3)-6". A cool bluish white with falls veined deeper	.35
BRIDE (2-3)—10". Large fine white, heavily scented	.15
BRIGHTNESS (3-4)—(Emig. 1935)—10". A lovely bright yellow of fine form and color, and showing no veinings. S. arched, bright primrose yellow; F. straight hanging a tone deeper, and gold beard. Better than Harbor Lights and Excelsa	.75

BUZZER (2-3)—6". S. ageratum blue, slightly metallic; F. purple, lighter at edges, yellow beard	.3
COERULEA (1-2)—6". A lovely pale blue, falls deeper	.2
CYANEA (1-2-3)—6". Fine large dark violet purple of good form	.1
DITTON PURPLE (3-4)—6". Uniform deep violet, including the beard. A fine clear color	.1
DIXMUDE (1-2-3)—6". Very free blue and violet bicolor	.1
DR. MANN (3-4)—6". Smoky violet and purple. Bears two or three flowers on a stem	•2
EBURNEA (2-3)-6". Lovely pale sulphur, F. deeper	.2
ENDYMION (2-3)-8". Very beautiful dark ruby red bicolor	•2
EXCELSA (2-3)—10". Light chrome yellow with a golden beard	.2
GLEE (2-3)—9". Pale yellow flowers with a deep chrome beard. Two and three flowers are borne on a stem	•2
GLORIA (1-2-3)-8". Large crinkled cream, with deeper falls.	•.
GOLD FINCH (2-3)—6". A bright golden yellow, very desirable	•.
GORGEOUS (3)—15". Very large plum purple bicolor, with velvety falls	
GRAMINEA (3-4)—8". Lovely garnet red self	•
HARBOR LIGHTS (2-3)—6". Finely formed flowers of clear light yellow. Regarded as the best light yellow dwarf	•
HURON IMP. (3-4)—5". A fine velvety blue black self	•
JUDY (3)—9". Very fine dark ruby self, with a white tipped beard and throat	•.
LADDIE BOY (4)—8". Large blue purple bicolor. A new Sass variety with two and three flowers on a stem	•.
LA FIANCEE (3)—5". S. bluish white; F. paler. Pale yellow beard. Good variety	•.
MARGARET (2-3)—6". Fine flushed white, tinted lavender	•.
MAROCAIN (1-2-3)—6". Dark violet with purple black falls. Large flowers of good form. Free bloomer	
MAX (3-4)—5". S. open, lemon yellow; F. deeper shade. Good color. Deep orange beard. Broad divisions	• 4
MIREILLE (2-3)—5". Plum violet, with a glowing orange beard	.]
MISTRAL (2-3)—10". S. dark violet; F. velvety, darker shade. Deep gold beard	•4
MONS. STEICHEN (3)—7". S. bluish white, F. veining throughout, and a deep maroon blotch. Pogo-cyclus hybrid	,
NEGUS (1-2-3) -8" Good dark violet purple Board vellow	

NEOLA (3)—8". S. livid violet, with a coppery glow at the claw; F. brown velvet with a decided coppery haft. Beard dull gold tipped bluish white. Has a very new and attractive pinkish violet and copper tone	. 7
NIOBE (2-3)-6". Fine very deep blue purple. Blue beard	.1
NUGGET (2-3)-10". Clear medium toned yellow	.2
ORANGE QUEEN (2-3)—7". Clear yellow self, the best deep yellow	.2
PHOEBUS (3)—5". Lemon yellow self, even to the beard	.3
PETIT AMIE (2-3)—12". Greenish white and cream	.2
PRAIRIE GEM (3)—6". Bright yellow self of good form and substance	.3
PRINCESS LOUISE (2-3)—6". A lovely large clear blue. S. Cambridge blue, F. China blue	.2
PUCK (3)—8". Large and very dark red brown purple; with velvety blackish falls, beard deep gold	.3
REFLECTION (2-3)—6". S. light gray blue, ruffled; F. same, flushed darker. Clear color	.3
REICHENBACHII ORANGE (3)—6". S. lemon yellow, falls deeper tone	•2
ROSE MIST (2-3)—8". S. heliotrope; F. darker shade. White haft reticulations and beard. A decided dull rose tone	.2
SEA GULL (2-3)—5". S. pale sulphur; F. flecked violet	.2
SILVER ELF (3)—6". Bluish white standards and silvery falls veined pale gray blue. Lovely. Small roots and slow growth. Cream beard	•7
SPRING SKIES (2)—5". Lovely pale blue, falls deeper shade	.2
STANDARD (3)-7". S. violet, F. plum purple. Large	.2
STATELLAE (4)—12". A lovely creamy white with deeper falls. Orange beard. Fine for cutting	.2
SULPHUR (3)—8". Very large soft yellow	.2
TONY (3-4)—8". A fine large deep blackish red violet, with a velvety falls and bright orange beard	.5
WENDY (2-3)—6". S. lavender blue, F. dull violet with a paler edge. Coppery brown reticulations are on a white haft that extends to the end of the beard. Large and free	.5
WIGAN (3)—6". A dark brownish red with a golden beard	.3
YLO (3-4)-5". A dainty clear soft yellow with flaring falls and	
a golden beard	.2
ZANZIBAR (3)-6". A dark violet bicolor. Very nice	.3
ZOBEIDA (2-3)—6". S. slaty: F. velvety dark purple	.3

Dwarf Bearded Iris Collections

- Seedlings of fine named varieties. Mixed, 75c per dozen, \$5.00 per 100.
 - Collection of 10 named varieties, labeled our selection, \$1.00.
 20 plants in at least 4 varieties, not labeled \$2.00
 100 plants in at least 10 varieties, not labeled 7.00
- SPECIAL ROCK GARDEN COLLECTION—20 roots of 10 varieties for \$2.00—3 each of Atroviolacea, Bride, Dixmude, Bluestone, and Gloria, and 1 each of Endymion, Harbor Lights, Princess Louise, Glee and Marocain.
- PREMIER COLLECTION—One each of the following new varieties: Blue Jade, Buzzer, Laddie Boy, Puck, Silver Elf and Wendy, cataloging \$2.60, for \$2.00 postpaid.
- QUANTITY PRICES—Any 10c variety, 3 of a kind for 25c, 90c a dozen, \$6.00 per 100. Any 15c variety, 3 for 40c, \$1.25 a dozen, \$8.00 per 100. Any 20c variety, 3 for 50c, \$1.50 a dozen, \$10.00 per 100. Any 25c variety, 3 for 65c, \$2.00 a dozen, \$13.50 per 100. Any 35c variety, 3 for 90c, \$3.25 a dozen. Any 50c variety, 3 for \$1.25.

BULBOUS DWARF IRIS

They bloom in late March or early April. Order early in the season for Summer or Fall delivery.

Intermediate Iris

This group includes varieties intermediate in height and time of bloom, coming just after the Dwarfs, and before the Tall Bearded. They are valuable for bridging the gap between the early and late varieties, and to plant in front of the taller varieties in the garden border. Many of the dwarfer varieties can be used in a large rockery or hillside planting, where plants of a taller growth can be used. The darker blues and purples are especially good planted with Cheiranthus, tall alyssums, iberis and other rock plants in white and yellow shades.

Hybridizers have recently been turning their attention to this group, and are producing large flowered varieties of fine form and color.

Many of the late ones bloom with the early flowering tall varieties, and supply the lower height often needed in border planting. This group has not received the attention it should, as it blooms in a time when cut flowers are scarce. The time of bloom of most varieties is indicated by a system similar to that used in the Tall Bearded Groups: (E)—Early; (M)—Midseason; (L)—Late. The blooming season usually lasts from 2 to $2\frac{1}{2}$ weeks.

Prices except where noted are 10c each, 3 of a kind 25c, 70c a dozen, \$4.50 per 100.

- ALICE HORSEFALL (H. P. Sass 1929)—30". A very large velvety red purple, with a deep golden beard. Fine form. 60c.
- AUTUMN QUEEN (H. Sass 1929)—18". A fine pure white that blooms several times a year. 35c.
- CHALLENGER (J. Sass 1930)—S. dull dark purple; F. velvety blackish violet. A very large variety with a long blooming season. 35c.
- CHARMIAN (M)—28". Lovely pale blue with a deep orange beard. 20c.
- CHIEF (L)—24". A very large deep blue purple. 25c.
- CRYSORO (Nich. 1931)—26". Very clear deep luminous yellow. A large ruffled flower of good shape and substance. Very free. \$1.75.
- CYMBELINE (M)-30". Nicely formed flowers of ageratum blue. 20c.
- DOROTHEA (E)-18". A very pale lavender blue. Large.
- DOXA (H. Sass 1929)—24". S. buff tinted lavender; F. olive, heavily veined purple, and washed with yellow at the margin. A very striking color. 35c.
- FELDSPAR (Mor. 1923)—12". Soft yellow with golden fall veinings. 60c.
- FIRMAMENT (M)—30". A fine pale blue, with deeper colored falls. FRITJOF (M)—15". A violet bicolor, effective in mass.

GERDA (E)-18". A creamy bicolor with crinkled standards.

GERMANICA MAJOR (M)-24". Large red purple bicolor.

HALFDAN (E)—18". Large creamy white.

HELGE (E)-20". Fine clear yellow of good form.

HELOISE (J. Sass 1931)—A new fine deep red purple. \$1.00.

INGEBORG (E)-20". Good pure white.

IVORINE (E)-18". White with a yellow center. Crinkled.

KOCHII (M)-24". Smooth deep red purple self.

KURDISTAN-15". S. reddish purple, F. rich dark purple, almost black. A very profuse bloomer. 20c.

LADY LUCK (L 30)-Rich shade of deep dark purple. Very free. 25c.

LURIDA (M)-15". A very attractive tawny bronze red. 25c.

LUSTRE (L)-36". A deep rosy purple.

MAYGOLD (Nich. 1931)—28". A clear, sparkling canary yellow. 50c.

NYMPH (H. Sass 1927)-24". Deep empire yellow. Very free. 25c.

OTOE (H. Sass 1927)-30". Velvety red violet with darker falls. 35c.

PEARL BLUE (Sturt. 1925)—(L)—15". Very pale blue. Excellent for borders. 20c.

PRINCE VICTOR (E)-22". S. Lavender blue, F. velvety purple.

QUEEN FLAVIA (E)-18". Clear primrose yellow. Good.

RAGUSA (H. Sass 1929)—26". S. pansy purple, F. blackish red purple. Has from five to seven flowers to a stem. Quite distinct. 35c.

ROYAL (E)-20". Dark purple bicolor, with reddish falls.

SOLEDAD (M)—24". A good clear luminous yellow. 25c.

SPARK (Nich. 1931)—28". A very new color. Brilliant dark garnet red, falls velvety. Very free. 50c.

SUNBEAM (Murrell 1927)-24". Large deep canary yellow. 25c.

TIDBIT (L)—15". Clear medium lavender. Very pure color and useful in a border planting. 20c.

WALHALLA (E)-24". Pale lavender with deep purple falls.

ZWANENBURG (E)-20". S. pale buff, F. dark brown edged violet.

Four of Sass' intermediate seedlings under number are offered. They are very free flowering and were in great demand.

No. 1-16". Very dark violet purple self with velvety falls. Lovely. 20c.

No. 2-20". S. violet purple, F. velvety petunia violet. 10c.

No. 3—20". Deep carmine violet self, with a deep velvet semi-flaring falls. Broad divisions. S. snow white beard. A very red toned flower of good form. 25c.

No. 4-20". A very large and free flowering pure white with a golden beard. 20c.

QUANTITY PRICES—Any 20c variety, 3 for 65c, \$2.00 a dozen. Any 35c variety, 3 for 90c. Any 50c variety, 3 for \$1.25.

Special Intermediate Collection

A fine collection of varieties embracing all colors would be: Dorothea, Firmament, Fritjof, Halfdan, Helge, Ingeborg, Kochin, Lustre, Major, Prince Victor, Walhalla, and Zwanenburg.

Collection of 1 each of 12 varieties for \$1.00 postpaid; 3 of each for \$2.25; 6 of each for \$4.00, not prepaid.

A collection of Novelties, including Challenger, Charmian, Chief, Doxa, Heloise, Lady Luck, Nymph and Sunbeam, cataloging \$2.90, for \$2.25 postpaid.

BARGAIN MIXTURE—\$3.00 per 100; \$20.00 per 1,000. Over a dozen varieties, embracing all shades, are included. Plant liberally, enjoy the early bloom, and have an abundance of cut flowers.

Fall Bloomers

These varieties bloom a second time in Fall, but the plant must be in good condition. It is advisable to apply a quick acting fertilizer late in Summer, to induce a more heavy growth. This type of Iris should be very popular in localities that have a long Fall. Most of them are of the dwarf and intermediate type.

AUTUMN QUEEN (12")—A good, free blooming white \$	0.25
DORCAS HUTCHESON (18")—Fragrant, deep violet self	.75
ELEANOR ROOSEVELT (26")—Very fine deep velvety red violet	1.50
EQUINOX (26")—Well branched red purple bicolor	1.00
JEAN SIRET (9")—S. clear yellow; F. yellow, flecked violet	.35
LIEUT. DE CHAVAGNAC (10")—Fragrant bronzy red violet	.50
OLIVE WHITE (18")—Deep cream, veined with green	.50
SEPTEMBER SKIES (16")—A dependable clear, rich purple	.50
ULTRA (14")—A lovely ultramarine blue bicolor	.25

Beardless Iris

No flower lover can afford to neglect this group of Iris. They can be used in so many ways, and merit wider recognition in our gardens. Planted in the flower border, the flowers and foliage are a good accent for other plants. They should be planted in early Spring, not later than the last of April, and again from late August to early October. The rhizomes should be placed one inch below the surface and kept moist until growth starts. They want a deep, rich soil, free from lime. Add peat moss and rotted manure to lighten the soil. Water liberally during the blooming season. The plants resent water standing on the crown in winter, otherwise they can stand a very moist soil.

HEXAGONA SECTION

These bloom after the Tall Bearded, and are quite unique. Some have flattened forms like the Japanese, and embrace shades not found in other sections. Many are native to Southern States, but have been found to be hardly as far north as Minnesota. Several expeditions have been made under the auspices of the New York Botanical Garden, and many new varieties have been named and introduced.

They like a rather rich and porous soil, leaning a little toward an acid condition. Cover with peat moss or excelsior over Winter.

dela condition. Cover with peat moss of excession over winter.	
AUGUST FLAME-40". A Fall flowering Fulva with large flowers of flame red on branching stems	6.00
CHRYSOPHOENICIA—3-4 ft. S. dark violet purple; F. redder with brilliant golden veins. Flowers often measure 5" across	1.00
DOROTHEA K. WILLIAMSON—33". Large flowers of velvety madder crimson. A vigorous Fulva hybrid	.20
ELEPHANTINA—3 ft. Very floriferous ivory white with golden crest. Blooms of good size. A very rare and lovely variety	1.50
FOURCHIANA—3 ft. A strong grower with wine red flowers, heavily veined. Free bloomer	2.75
FULVA—18". Flowers of brilliant coppery red. Unusual color. All six petals open out flat, like those of Japanese Iris	.25
FULVA—Extra large and tall. 3½-4 ft. A much taller and large flowered variety with a brighter color	3.00
FULVA—Extra bright red. 3½ ft. A much deeper and larger flower than the type	2.50
GIGANTICOERULEA—China blue. 4-5 ft. A select form of this variety. Very large blooms with fine shape and substance	1.75
GIGANTICOERULEA ALBA—4-5 ft. A pure brilliant white form of this type. Scarce	4.00

GIGANTICOERULEA—Deep blue. 4-5 ft. A most brilliant color	2.50
HEXAGONA—A swamp Iris of the Southern states with striking blue flower. Erect stems	.50
JAMES ZACHARI—40". A very rich form of Vinicolor. F. velvety blackish red violet; S. erect, bluer. Style arms dull claret	4.00
LANCIPETALA-48". Large, beautiful pale silvery lavender.	3.00
LOUISIANA SUNSET—A very deep coppery red form of Fulva; the darkest and richest as known	5.00
OENANTHEA—3 ft. Flowers 4" in diameter. A red purple bicolor, with a gold crest. Very good	•75
REGALIS 4 ft. Large, flat flowers with white rounded falls of ashen pink, lemon underneath. Lovely	1.50
RUBICUNDA—3 ft. Brilliant magenta cerise, a very lovely and striking color. Bright yellow crest. Large	3.00
THOMASII—3 ft. Glowing red purple, a little redder than Chrysophoenicia. Very free and lovely	2.00
VINICOLOR—3 ft. A gorgeous wine red with velvety falls a little darker, showing a glowing signal patch. A very rich and striking color	.50
VIOLALUTEA—3 ft. Bright purple mauve with a gold crest. Stems very erect and nicely branched	1.00
VARIOUS SPECIES AND HYBRIDS	
These bloom at about the same time as the Siberian and Tall Bearded Types.	
AUTAUGA (Nich. 1930)—32". A bright rose form of Carolina. S. veined bright rosy purple; F. deeper, with heavy gold signal patch; style arms and crest blush. Very lovely	
BELAMCANDA CHINENSIS—4 ft. Orange, spotted with red. Blooms in July and August, and the black seeds resemble a blackberry	.25
CHRYSOGRAPHES—28". A Chinese species resembling a single Japanese Iris in form, but with narrower petals. Velvety violet purple of a very deep tone	.75
CRISTATA—3". Tiny clear lilac flowers with a white crest. 25c each; \$2.25 a	dozen
CRISTATA ALBA—3". A rare white form with large flowers	1.00
ENSATA—12". A native of Central Asia. Dainty soft lavender flowers that often bloom with the Dwarf Bearded. Is very drought resistant, but will grow luxuriantly in a moist spot. 35c: 3 for 90c: \$3.00 a	dozen

FOLIOSA—20". Large brilliant violet blue flowers with a white and gold signal patch. Stems zig-zag on the ground, bearing blooms at each node	.25
PSEUDACORUS—48". Broad petaled, bright yellow flowers that are especially adapted for damp places. Very hardy. 20c each; 3 for 50c; \$1.75 a	dozen
TECTORUM—15". Graceful flowers of blue purple with a white crest. Thrive best in half shade 25c each; \$2.25 a	dozen
TECTORUM ALBA—15". A large white form with golden crests. Rare	1.50
VERSICOLOR—24". Native swamp Iris; has good foliage and showy light lavender flowers	.35
V. COLUMNAE—Raised from seed. A lovely large flower. S. erect, medium in size, violet blue; F. very large, horizontal, closely veined deep violet blue on a white ground, broad margin at base, medium blue. Dull red gold blotch. Very blue in tone	
V. FOSTERI-22". Small blooms of dull purple, veined deeper	.75
V. KERMESIANA—26". Falls dark velvety claret, with claret veinings in pure white central area. Very showy	1.00
V. LILACINA-32". Good sized blooms of medium lavender blue	.75
V. PURPUREA—30". Late flowering. Resembles Rosea in form, but a little smaller. Bright violet purple	.75
V. ROSEA—Very large and broad drooping falls of medium rosy purple, deeper velvety veining throughout. Broad white blotch	1.00
VIRGINIENSIS—34". Resembles Versicolor in form. Medium violet blue with flaring pointed falls	.50
SIBERIAN GROUP	
The varieties of this group are easy to grow, and have a decorative in the garden when out of bloom. They bloom about the same to the Tall Bearded, and have a good landscape value, as for borde brook or pond, where they should be kept above the water line. blooms are especially good for cutting, and last a long time when These are borne on tall, wiry stems, and held erect above the rand grass-like foliage. The introduction of new varieties has add their popularity.	ime as ring a The n cut.
BLUE FLAME (Cleveland 1927)—36". The lightest blue Siberian, brilliant pale blue. Large and broad petaled flowers.	\$.75
BLUE HERON (Cleve. 1927)—36". Large medium blue violet flowers with white style arms. A distinctive color contrast	.50

BLUE RIDGE (Cleve. 1929)—32". Lovely light blue, shaded turquoise, with fine broad flowers and fringed stigmas	.75
BLUE WINGS (Cleve. 1929)—An exquisite flower of the broad Orientalis type. Clear light blue with no veinings in the falls. One of the finest in the garden	.50
BOB WHITE (Cleve. 1925)—28". A large, pure white. Heavier textured and larger than Snow Queen	.50
BUTTERFLY (Cleve. 1920)—36". Clear porcelain blue with a white veined throat	.35
CAESAR (Morgan 1929)—A new red purple which is described as the largest and richest colored Siberian ever introduced.	. 75
DUCHESS OF YORK (Perry 1924)—Very large flowers with broad circular falls, of deep rich violet blue; lighter and bluer in tone than Lady Northcliffe. A beautiful flower	.25
EMPEROR (Wilson-collected)—A noble form of Orientalis. Very large, deep violet flowers, borne on 42" stems	.35
GATINEAU (Preston 1932)—30". A very large medium blue of fine form and substance. H. M., A. I. S., 1933	3.00
KINGFISHER BLUE (Wallace 1924)—42". Immense sky blue flowers that are larger and finer than Perry's Blue. The color is more brilliant and it has less reticulations than its parent	.35
KOOTENAY (Pres. 1932)—32". F. are light bluish lavender veined and mottled violet, 2" across and drooping; S. lighter. A very lovely variety	1.00
LADY NORTHCLIFFE (Perry 1920) — 32". A strong, free flowering seedling of Orientalis and a great improvement over it. Very large flowers of brilliant deep violet blue with a pretty white veined haft. One of the first to bloom	.25
LLEWELLYN (Cleve. 1929)—This is claimed to be one of Mrs. Cleveland's very finest blue Siberians. Very tall, with flowers of a most unusual shade of soft blue	.75
MADAWASKA (Pres. 1932)—40". The straight hanging broad falls are violet blue, veined darker; S. lighter, and pale blue style arms	1.00
MATTAWIN (Pres. 1932)—36". Clear medium blue, like Periwinkle, but the drooping falls are more pointed; S. darker.	1.00
MORNING MAGIC (Cleve. 1931)—A very early bloomer. It is a tall growing variety with large flower measuring $4\frac{3}{4}$ " across. Soft lavender, suffused rose. Scarce	2.00
MOUNTAIN POOL (Cleve. 1931)—36". Bluer than Periwinkle, but the divisions are broader and larger. F. horizontal and there is no white blotch in the center. A lovely clear soft blue	1.50

MRS. BEVAN (Pres. 1932)—38". Drooping falls of dark blue violet; S. and style arms indigo blue	1.00
MRS. ROWE (Perry 1923)—36". A very pretty silvery lavender. The flower keeps its lavender pink tints in slightly shaded places	.20
NIPIGON (Pres. 1932)—32". S. celar medium blue; the drooping falls more violet in tone	.50
NURSE CAVELL (Perry 1923)—36". Soft violet standards and dark blue falls veined white. A most distinctive flower with beautifully marked falls	.25
I. ORIENTALIS—30". One of the parents of the varieties listed here. The color is deep purple and the flowers have broad spreading falls	.20
PAPILLON (Dykes 1923)—42". Next to Blue Flame, the lightest blue Siberian. A lovely large pure Cambridge blue	.25
PERIWINKLE (Cleve. 1926)—40". Perhaps there is more demand for this variety than for any of the newer Cleveland introductions. A darker, richer Perry's Blue, with very large and finely formed flowers	1.00
PERRY'S BLUE (Perry 1912)—42". By far the most popular Siberian Iris. Large flowers of pure sky blue with white haft markings	.25
PERRY'S PIGMY (Perry 1912)—20". A very dwarf variety with rich deep violet blooms borne in the greatest profusion	.25
RED RAIDER (Cleve. 1927)—32". A velvety red color when it first opens, changing to deep violet purple. Brilliant	1.00
RIDEAU (Pres. 1932)—36". The drooping circular falls are a medium blue, with a broad white patch; S. darker	٠75
SNOW QUEEN—30". Pure glistening white flowers with a lovely golden throat. The most popular white	.15
SUNNYBROOK (Cleve. 1920)—30". An exquisite shade of grayish or Alice Blue. Large flowers with broad spreading falls	.25
THELMA (Perry 1923)—42". Perry considers this an improved Perry's Blue. It is a lighter tone, a soft China blue with a beautiful white throat. The large, finely formed flowers rival even Kingfisher Blue in size	.25
WHITE DOVE (Cleve. 1927)—42". This might be called a White Emperor. It has the same form, texture, height and shape as Emperor, but is a pure white	75،
Collection of 8 Distinct Varieties for \$2.75. Strong Divisions	

QUANTITY PRICES:

Any 15c variety, 3 of a kind 40c, 12 for \$1.20. Any 20c variety, 3 for 50c, 12 for \$1.75. Any 25c variety, 3 for 65c, 12 for \$2.20. Any 35c variety, 3 for 85c, 12 for \$3.00. Any 50c variety, 3 for \$1.25, 12 for \$4.50. Six or more at the 12 rate. Postage not prepaid for larger quantities.

Special Collections

- SIX NAMED VARIETIES, our selection, for \$1.00; 12 varieties for \$2.50 postpaid.
- SIX NEW VARIETIES—Blue Flame, Blue Heron, Blue Wings, Bob White, Kingfisher Blue, and Red Raider, catalogued \$4.75, for \$3.75 postpaid.
- FOUR NOVELTIES—Llewellyn, Periwinkle, Turquoise Cup and White Dove, catalogued \$3.50, for \$2.75 postpaid.
- FIFTY UNLABELED NAMED VARIETIES, all colors, for \$5.00, not prepaid. Strong divisions are sent.

Spuria Group

The stately Spurias are one of the best for water sides or pools and are very effective in the background of a hardy border. They have been sadly neglected by the flower lover, but when the fact becomes more generally known that they bloom after the Siberians and the Tall Bearded, every gardener will want a few in order to prolong the season. Then, too, the flowers are entirely different from those of our Beardless Iris. The standards and falls are very long and narrow, with a signal patch of yellow on the fall. They resemble larger and taller Spanish Iris. All varieties are hardy, but are slower growing than the other types. They relish a rich loamy soil and when once established bloom consistently without attention. The rhizome should be set 2" below surface.

A. J. BALFOUR—48". A handsome tall hybrid of Cambridge blue with a rich yellow throat
I. AUREA (Species)—40". A most handsome flower of rich golden yellow. This is the species and should not be confused with the Bearded Iris Aurea, which is also yellow, but belongs to an entirely different section of the genus
LORD WOLSELEY—40". The darkest blue color in this group. The immense blooms are deep blue purple. One of the finest ever introduced. The stock never meets the demand. \$1.00 each; 3 for \$2.50
MRS. TAIT—42". The most vigorous and free flowering of the Spurias, and therefore the most popular. The color is a soft porcelain blue
I. OCHRALEUCA (Species)—One of the tallest of all Irises, the stems often measuring 60" with several tiers of large white flowers marked yellow at the throat.35c each; 3 for 90c; \$3.25 a doz.
OCHR. SNOWFLAKE—A fine pure white
SHELFORD GIANT—A rare hybrid of Ochraleuca, even surpassing it in height. When well established, we have grown it 72 inches high, overtopping everything in the garden. S. creamy white; F. cream with a bright yellow signal patch. The last to flower, late in June. Very slow growth \$3.00
One each of Balfour, Mrs. Tait, and Ochraleuca,

catalogued \$1.20, for 90c postpaid.

Japanese Group

The interest in Japanese Iris has been steadily on the increase. The beauty of the flower itself, its habit of prolonging the season of bloom, and the new varieties that have been introduced in the last few years, have helped to make it more popular. The plants flourish in any garden border, where water can be supplied in times of drought, and are especially effective around pools or water sites. It should be planted in Spring or early Fall, and kept watered until the plant is established. A Winter mulch of manure is good, and this can be worked in the ground later. The plants like a loose, slightly acid soil, and plenty of water during the blooming season, but not overhead spraying.

A visit was made to the Brooklyn Botanical Gardens in 1931. Here you will find the largest collection of Japanese Iris in America, carefully labeled and well grown. Prof. Reed, in charge of this collection, has divided them into seven color classes, according to the color of the falls. We believe that our list is the first one in which this color classification is followed. It should help you select distinctive ones and eliminate guesswork found in reading descriptions generally given.

In allotting the Iris to the various classes, the A. I. S. Check List and Prof. Reed's own recommendations have been followed. We think that you will find this a greatly simplified way to order Iris. The plants vary in height from 30 to 50 inches.

Prices Except Where Noted Are 35c Each; 3 of a Kind for 90c; \$3.25 a Dozen. Strong Divisions Are Sent.

CLASS 1

White flowered varieties, although the standards of the singles may contain color.

SINGLES

APOLLO-White, deep rose red veins in center. S. rose purple.

DOUBLES

BANKSIAE—A very large ruffled white. 75c.

BETTY F. HOLMES (Childs 1930)—A finer and larger Gold Bound. Pure white with midribs of lemon yellow. Very graceful foliage. \$1.00.

GEKKO-NO-NAMI—Large early white with yellow throat.

GOLD BOUND—Best white in general cultivation. Waxy texture with a golden midrib.

KOSUI-NO-IRO—Large white, with drooping falls. 50c.

SILVER STARS—Large blooms of a smooth and heavy texture. Rare. 75c.

CLASS 2

Varieties are white in garden effect, but on inspection are found to have a slight flush of color between the veins. There is a marked white zone around the yellow blotch, with broad white veins radiating outwards more or less to the margin. This represents the smallest class, but the varieties in it are all distinct and beautiful.

SINGLES

- GRENADIER (Kemp 1927)—White, overlaid with a bright lavender sheen; the upright standards are a soft lavender, edged blue; blooms 8" in diameter. 75c.
- MRS. GEO. STUMPP (Childs 1926)—Large flowers with red purple standards and faint blue flushings on the falls. Quite distinct.
- PAINTED LADY—Rose purple flush between the veins. S. white, with phlox purple edge. Quite dainty. 50c.
- ZAMA-NO-MORI—White falls, very large and drooping, with a strongly marked sky blue zone in center; S. white, edged pale blue. Extra. 50c.

DOUBLES

MOONLIGHT WAVES—A lovely white overlaid with light pink; pale yellow halo. Scarce. \$1.00.

CLASS 3

Falls show a distinct white zone around the yellow blotch, with white veins radiating outward to the margin. The color is deeper and more uniformly distributed between the veins.

SINGLES

- AYASI—Broad white veins, with a wide crimson edge. 50c each; 3 for \$1.25.
- DOMINATOR—Rich indigo blue with narrow stripes and veins. S. white, with colored margin. 35c.
- INDO—Rich dark blue, with broad, wavy petals. Center veined very slightly, and has unusual depth of color in the yellow central blotch.
- KAMATA—Sky blue with very narrow white zone. S. white, with light bluish violet edge.
- NIJI-NO-TOMOE (Rainbow Crest)—Reddish violet with prominent white veins. Large and fine. \$1.00.
- PORCELAIN SCEPTRE—Blue, with broad white center, and pink blotch. 50c.
- RED RIDING HOOD—Medium size, but brilliant coloring. Amaranth red, with broad white zone and veins.

- REINE HELENE—Lovely clear lavender blue. Veins are pale blue and indistinct. No white zone around yellow blotch. Rare. 75c.
- TEMPLE FLOWER—Soft bluish violet blended on ivory white. S. white, edged phlox pink. 50c.

DOUBLES

- CHOSEIDEN—Broad band of reddish purple, edging white center. 50c.
- CLOUDY SKY-Large white center, with heavy crimson border. 75c.
- CRYSTAL—Bluish violet, with broad white veins. Lovely. 35c.
- FASCINATION—Intense velvety red violet flushing on a white background that has a pink cast. A very popular variety. 50c.
- HODAI—Very large reddish violet with broad veins. Many extra petaloids and style branches standing in a bunch from the center. 75c.
- HO-O-JO—Uniform velvety maroon with broad white veins. Blue halo around central blotch.
- KUMO-NO-OBI—Broad band of sky blue around the margin of standards and falls. Color deeper and broader in falls. 50c.
- LUCIE MARSHALL—Light pansy violet, with white veins, and broad white zone around yellow blotch. Fine. 60c each; 3 for \$1.50.
- MRS. J. A. HAYDEN-White center; shaded and edged pale violet.
- NINA—White ground, heavily flushed reddish violet. Large. 75c.
- UCHIU—Violet blue with narrow white veins. Tall, with a long season of bloom.

CLASS 4

Falls have a white background with deeply colored veins, and often dots and pigmentations of areas, giving a solid color effect.

SINGLES

- BETTY JEAN CHILDS—White, faintly splashed and veined orchid, petaloids a deeper shade. 50c.
- CARLTON CHILDS—Ivory white, veined plum. S. pink toned.
- CELESTINE (Kemp 1927)—Deep silvery pink, veined blue, with orange blotch. S. deep silver pink, veined deep blue. \$1.00.
- GYOKUHOREN (Jeweled Lotus)—Pale reddish violet ground, veins darker. Form resembles that of a lotus flower. \$1.00.
- MASAKO'S MIRROR—Heavy velvety veins and flushings on a gray ground. F. plum edged white. Very large and lovely. Rare. \$2.50.
- MINAINI—Large falls, heavily veined red violet, and S. are same color with a white edge. Very good. \$2.50.
- OTOMENE—S. large, plum edged gray; F. gray ground, heavily veined and flushed violet. A large and lovely variety. 75c.
- SHIMOYO—S. erect, plum edged white; F. broadly and deeply veined violet on a gray ground. Showy. 75c.
- TOPAZ—Reddish amaranth veins on an ashy background. 50c.
- WAKA-NO-URA-White, flushed and veined blue violet. 60c.

DOUBLES

- DORIS CHILDS—Pearl white, deeply veined rosy plum. S. deep plum, edged white.
- ECLAIR-White, veined blue, with an amber throat.
- HELENE—Very clear dark blue veins and flushings. Good, clear color. \$1.25.
- LA FAVORITE—French gray, veined blue. S. heavily flushed violet.
- MARJORIE PARRY—Delicate mauve flushings, giving the effect of a solid color. Tufted center. Very lovely. 50c.
- ROSE ANNA-Heavy ruby red veins. S. dark plum. 50c.
- SHOKKO-NIKISHI—Pale violet veinings on a white ground with minute old rose spots. Crests edged pink. Scarce. \$1.00.
- WAREI-HOTEL—Pale lavender blue, with dark violet veins. Light blue halo around crimson blotch. Large flower, tufted center. 50c.

CLASS 5

Falls generally with deeply colored veins, and with the color evenly distributed between them. The shades are in the lighter tones of lavender, lavender pink, mauve and rose purple. Can be classified as light selfs, and embrace some of the most lovely colorings in the pink tones.

SINGLES

- AIRSHIP—Very tall, broad, crepy falls of lavender blue, shaded pink at the edges, with a white halo. Wide standards of soft plum. 75c.
- AMETHYST—Large, wavy petals of exquisite lavender, deepening around the blotch. A tone deeper than Frances Cleveland. 60c.
- BLUE GIANT (Childs 1932)—New, the largest and finest Iris of its color—a beautiful bright blue. \$1.50.
- BOKHARA—Charming pink lavender, with blue blotch. 75c.
- DAY DREAM (Kemp 1927)—Dwarf. Soft pinkish lilac, lightly veined pale violet blue, with a heavier shading at the center. S. pale pink and blue. Very lovely and dainty coloring. \$1.50.
- GYOKUHOREN—S. and crests tipped pale reddish violet; F. light rosy tone, deeper wire edge. A lovely pink toned variety. \$1.25.
- HELEN WELLS-S. rosy lavender, F. clear mauve lavender. 50c.
- OLYMPIA—F. rosaline pink; S. deeper. Blue coloring around yellow central blotch. A good sized flower of exquisite coloring. \$1.00.
- QUAKERESS—Light pinkish lavender, with a deep blue halo. Broad and wavy petals. Very good. \$1.00.
- SAKATA—S. and style and arms rosy lavender; F. lovely pale blue. Rare. \$1.00.

SHIMOYO—Light violet veins on a gray ground. 50c.

YONOMO-S. erect, light reddish violet; F. very pale violet. A very large flower of opalescent coloring. \$1.00.

DOUBLES

AOI-GURUMA—Brilliant blue violet with a pinkish cast. Flower very round in shape. 75c.

FRANCES E. CLEVELAND—A very large crepy blue lavender, shading to mauve at the edges. White halo. A lovely coloring. 50c.

NORMA—Lavender pink, with a blue blotch in the center. 75c.

CLASS 6

Similar to Class 5, except that the colors embrace the darker shades of blue and red purple. Veins in general are not noticeable. All of the dark, velvety toned varieties belong to this group.

SINGLES

AGNES REED—A lovely large flower of dark violet, with very velvety falls. 50c.

HIRADO-Large velvety red purple. 50c.

JOSEPHINE HEYWOOD—S. red violet; F. blue violet. 60c.

OYODO—A very large deep velvety violet, with drooping fall. A redder tone than Agnes Reed. Rare. \$1.00.

TAIKOON-Velvety deep violet blue self. Scarce. \$1.00.

VIOLET BEAUTY—Long, narrow fall of pansy violet, with a conspicuous yellow blotch. Very free bloomer.

YOKOHOMA—S. reddish violet; F. deep reddish violet, pale edge. Large flower. 75c.

DOUBLES

ARAGI-Deep blue violet.

ASTARTE—Dark violet purple. Late.

AZURE-Mauve blue, with a dark blotch. Yellow halo.

J. A. HAYDEN—A very fine violet blue. 50c.

JUNI-HITOE—Falls deep reddish violet with standards a brighter shade. Has five divisions instead of three. Rare. \$1.50.

KOKO-NO-IRO—Royal purple with a blue blotch around yellow throat and radiating white lines. Very brilliant.

KUMA-FUNJIN-Fine red violet, with a tufted center. 60c.

KURO-KUMO-A large deep purple, overlaid with blue. Late. 50c.

MAHOGANY—Deep mahogany red. Large and late.

PYRAMID-Good dark violet.

- ROSE SCHEEPERS—A charming flower of mauve gray, with blue veins and blotch around halo. Center tufted. 35c.
- TSURUGI-NO-MAI (Sword Dance)—Reddish violet, with circular petals. Scarce. \$2.00.
- VIOLET GIANT (Childs 1932)—New. Semi-double. Rich violet shading to rose. The large blooms measure 36" in circumference. \$2.00.

CLASS 7

Falls splashed or marbled with various shades of blue and red purple.

The varieties listed below are very distinct in color.

SINGLES

- IWATO-NO-HIKARI—S. reddish violet; F. has entire surface covered with broad, dappled streaks of velvety rosy violet, on a pale gray ground. Blue flush around central blotch. 75c.
- ONARUMI—Medium size flower of deep violet, mottled gray; S. deep plum. Very bright color. 50c.

DOUBLES

- ASAGIRE—Lovely large white, etched clear blue. 50c.
- EZO-NIKISHI—Deep reddish violet faintly speckled gray. Blue flush around yellow central blotch. Striking. \$1.00.
- HIMONO—Calico mottlings of reddish violet on a pale gray ground. Good color. 50c.
- ISO-NO-NAMI—Rose and blue suffusions on gray ground. Late. 50c.
- SENJO-NO-HORA—Vinous purple, speckled and splashed gray. Sky blue blotch around crimson center. 50c.
- SOFU-NO-KOE (Affection)—Clear violet blue mottlings on a French gray ground.

Special Collections

- SIX VARIETIES, our selection, labeled, for \$1.75 postpaid.
- TWELVE VARIETIES, one of each class, our selection, labeled, for \$3.75 postpaid.
- SIX EXTRA FINE VARIETIES—Frances Cleveland, Hodai, Iwato-No-Hikari, Shimoyo, Silver Stars, and Zama-No-Mori, catalogued \$3.25, for \$2.75 postpaid.
- QUANTITY PRICES—Any 50c variety, 3 of a kind for \$1.25, 12 for \$4.50. Any 60c variety, 3 for \$1.50. Any 75c variety, 3 for \$2.00.

Business Terms and General Information

PLEASE READ CAREFULLY BEFORE ORDERING

GUARANTEE—We endeavor to send varieties true to name. If an error occurs, notify us and proper adjustments will be made. We cannot be held responsible for results of plantings, because of lack of control over planting conditions. Heavy mother rhizomes will be sent, wherever stock allows. We have received many unsolicited testimonials from our customers last year expressing appreciation of the size of the roots sent them.

TERMS—Cash with order. A 10 per cent discount is allowed on orders of \$10.00 and more. This applies to single varieties or three of a kind, and not to collections or bargain groups. On orders for less than \$2.00 please add 25 cents for postage and handling.

TRANSPORTATION—Prices for one and three of a kind are prepaid, but not in larger quantities. Collections are not postpaid, except where mentioned. You will receive extra roots to cover the express charges.

SHIPMENTS—Bearded Iris may be sent at any time except during the blooming season. Summer planting is recommended. Novelties will be shipped after July 15th. Beardless Iris are best planted in Spring and Early Fall.

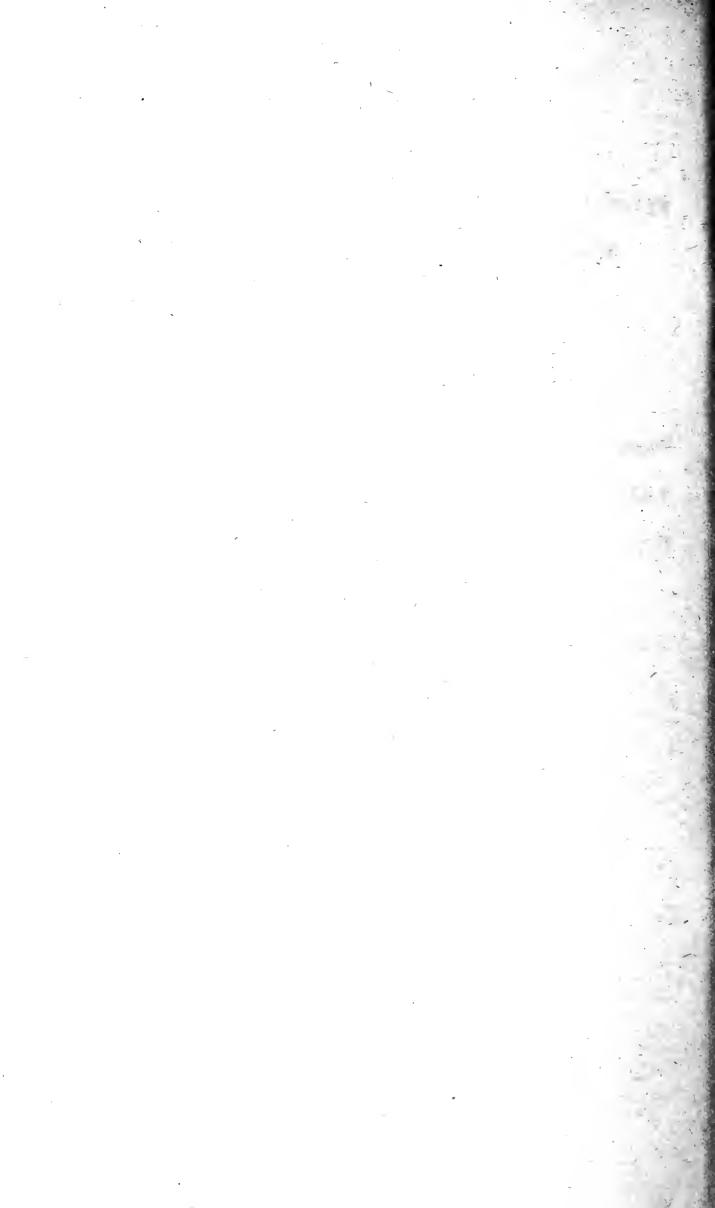

LOCATION OF GARDENS—We are located on the 3 C's Highway (State Route No. 3), approximately 10 miles from the business center of Cincinnati. Montgomery Road is one of the main arteries leading out of Cincinnati, and easily accessible from all parts of the city. You are cordially invited to visit the garden at any time.
